**Preview**                                                                    ✕

1.  What is the minimum number of disks required for RAID1?

    ○  1

    ○  2

    ○  4

    ○  5

2.  Physical Volumes are

    ○  The space on a physical storage that represent a logical volume

    ○  Disk or disk partitions used to construct logical volumes

    ○  A bunch of disks put together that can be made into a logical volume

    ○  None of the mentioned

3.  Which of the following are true. Logical Volumes _____

    ○  Can span across multiple volume groups

    ○  Can span across multiple physical volumes

    ○  Can be constructed only using a single physical disk

    ○  None of the mentioned

4.  What does "Uptime" refer to in an SLA context?

    ○  The total time a service is operational and available.

    ○  The time spent on negotiations during SLA drafting.

    ○  The time a service is intentionally taken offline for maintenance.

    ○  The time taken to resolve customer complaints.

5.  Before using a hard disk, you must (choose the correct order):

    ○  Mount, format, make partitions

    ○  Format, make partitions, mount

    ○  Make partitions, format, mount

    ○  Make partitions, mount, format
